Summary

A highly motivated graduate in Software Engineering with a strong passion for Web Development and Machine Learning. Experienced in building dynamic and responsive web applications using Ruby on Rails, React.js, and Django (Python). Skilled in analyzing complex projects, understanding client requirements, and delivering effective solutions through innovative thinking. Also experienced in developing machine learning models and applying AI techniques to solve real-world problems. Eager to contribute technical expertise in a collaborative and fast-paced team environment.

Education

University of Central Punjab

Oct 2020 – July 2024

BS in Software Engineering

- GPA: 3.53/4.0
- **Coursework:** Machine Learning , Software Engineering Natural Language Process Image Processing , Web Development

Experience

Python Developer

Software Engineer

NeuroOceans AI

Sep 2025 – Present

- Worked on multiple live production projects, collaborating with cross-functional teams to deliver scalable and high-performance applications.
- Developed and maintained backend systems using **Django, FastAPI, and Ruby on Rails**, implementing clean architecture and optimized business logic.
- Built and integrated **RESTful APIs** for seamless communication between frontend, backend, and third-party services.
- Implemented asynchronous task processing and background job management using **Celery** and **Redis**, improving system performance and reliability.
- Integrated secure payment solutions using **Stripe API**, including payment workflows, subscriptions, and transaction handling.
- Worked with various **AWS Services** such as EC2, S3, and cloud-based deployment workflows for scalable infrastructure management.
- Developed responsive and modern frontend interfaces using **React.js, Tailwind CSS, Bootstrap, HTML, and CSS**, enhancing user experience and application responsiveness.
- Applied **MVC architecture** and clean coding principles in Ruby on Rails applications for maintainability and scalability.
- Implemented secure authentication and authorization systems including login, registration, session management, and role-based access control.
- Contributed to debugging, performance optimization, feature enhancements, and production issue resolution across multiple projects.
- Utilized **GitHub** and collaborative development workflows for version control, code reviews, and team-based project management.

Python Developer

Associate Software Engineer

Visnext Software Solutions

Nov 2024 – Sep 2025

- Contributed to a live project (GreenPal), working closely with cross-functional teams to deliver production-level features.
- Developed a Bug Tracking System using Django and Ruby on Rails, enhancing issue tracking, resolution, and scalability

- RESTful APIs using Django REST Framework and FastAPI for seamless data communication.
- Frontend using React.js, Tailwind CSS, Bootstrap, HTML, and CSS, improving UI/UX and responsiveness.
- Applied MVC architecture in Ruby on Rails for clean code organization and maintainability.
- Developed a complete user authentication system with secure login, registration, and role-based access control.
- **Utilized GitHub for version control and collaboration:** for version control, contributing to code repositories and managing project workflows efficiently.

Software Engineer

Arix Technologies

AI/ML Intern Software

Jan 2024 – Oct 2024

- Developed APIs using Flask and Postman to handle HTTP requests and integrate backend functionality with Python.
- **Collaborated on AI-related projects:** applying machine learning algorithms to solve real-world problems.
- **Utilized GitHub for version control and collaboration:** for version control, contributing to code repositories and managing project workflows efficiently.

HiSKy Tech

June 2023 – Oct 2023

- Completed a 2-month online training focused on backend development using Python and Django framework.
- Learned to build basic websites with responsive frontend using HTML, CSS, and Bootstrap.
- Gained hands-on experience in creating Django models, views, templates, and URL routing for dynamic web applications.
- Practiced building small-scale web apps with user authentication, form handling, and complete CRUD functionalities.
- Strengthened understanding of MVC architecture, ORM queries, and real-world web development workflows.
- Improved debugging skills and applied version control (Git) during development tasks and project submissions.

Projects

Green-Pal Tech Stack: Python (Django), HTML, CSS, Tailwind CSS

- Developed a full-stack service booking platform with Django as the backend framework.
- Designed responsive UI using HTML, CSS, and Tailwind CSS to enhance user experience.
- Implemented user authentication, booking workflows, and admin dashboards.
- Focused on role-based access and seamless user-service provider interaction.

Final Year Project (Research Based)

- Body Part based Persons Reidentification Trying to improve person reidentification algorithm accuracy Data set used: Market1501, Duke, MTMC
- Tools used: Torchreid, PyTorch, TensorFlow, numpy, Pandas, OpenCV, OS Library, keras, sicikit learn, matplotlib etc.

Skills and Interest

Languages: C++, Java, Python, SQL, JavaScript, Django, Machine Learning, Ruby on Rails

Interest : C++ Python Django (Torchreid, PyTorch, TensorFlow, numpy, Pandas, OpenCV, keras, sicikit learn, matplotlib) WordPress PHP SQL Machine Learning Deep Learning MS Word Image Processing Natural Language Processing

Certification

- Web Design for Everybody • Basic Microsoft Office Skill • Data Science IBM Coursera
